AMENDMENTS TO THE SPECIFICATION

Please replace the last partial paragraph on page 9 (lines 23-30 on page 9) with the following marked-up replacement partial paragraph:

The electronic device 104 may be an electronic device implemented via any suitable hardware and/or software that sends requests to and receives responses from the electronic device 102 via the network 107. The electronic device 104 may include a storage device 150 and a processor 152 analogous to those already described above with reference to the electronic device 102. The electronic device 104 may further contain other components in various embodiments, such as an unillustrated input device, a bus, or any other appropriate components. The storage device 150 includes a client 154. The client 154~~client 140~~ performs transactions and sends associated requests to the server electronic
